

HUSH MODULAR LEG PLACEMENT INSTALLATION

Hush Modular units are joined together by aluminum legs which act as the connectors. The rectangular top plate and leg itself are designed to span between units. Legs with L-shaped top plates are designed to support corner units and/or attach tables to the upholstered models.

Pictured from the underside of a generic configuration, Figure A represents where the Hush legs are typically placed for the vast majority of configurations. Some exceptions may exist, however, any deviations will be minimal.
